Strain collection / indoor

by **SMPDO**

The **Strain** product family comprises an easy chair, a bar stool and tables of various heights. This diversified product family shares one common feature: the design of the product base and legs, which is always a challenge. The solution for very distinguishable leg junctions is found in intertwining and intertwisting of steel tubes whose modular relations can change depending on a particular use. The result is a recognizable family of products with variations of a common basic idea where the concept of junctions is not only an appealing formal interplay but also an element that complements the hardness of the construction. Visually light and uncustomarily slender, the Strain easy chair offers extraordinary comfort due to

the elasticity of leather tightly stretched over the seat shell. A lumbar cushion provides additional comfortableness. A saddle served as the inspiration for the ergonomic design of the solid wood seat of the barstool. This entirely functional family is rounded off with multidimensional coffee tables with various finishes.

Strain and **Unstrain** are like twins in the Strain collection but convey their own typology. Both chairs have a universal flair with their ergonomic design of a solid wood seat that can be additionally upholstered with leather or fabrics for superior comfort. They create the perfect solution for interior residential or public spaces. The

'strain' theme continues in the solid wood and ergonomically shaped saddle-like seat of a barstool, thus offering various ways of dynamic seating. Visually light and uncustomarily slender, the collection further consists of tables of various heights and finishes, and two newcomer chairs – Strain and Unstrain. Similar in even more simplified Strain form, their difference lies in the key family feature of intertwisting leg junctions. While Strain retains the twist, which provides the necessary construction stiffness, Unstrain releases it, resulting in the a contemporary interpretation of the 1950s universal chair, which is easily stackable.

SPECIFICATIONS AND TECHNICAL DRAWING

SUSPENSION	elastic webbing
SEAT CUSHION	HR foam
SUPPORT CUSHION	feather
BACKREST	leather (black or brown)
BASE	metal tube ø20 mm + powder coating
UPHOLSTERY	fabric / leather

SEAT	solid wood / with cushion / upholstered seat + lacquer or colour lacquer plywood / plywood upholstered seat + lacquer
BACKREST	solid wood + lacquer or colour lacquer, plywood + lacquer
BASE	metal rod ø16 mm + powder coating
